### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beckerdite.

See summary of the invention for general laminate structure, column 3, lines 15-67 and column 4, lines 1-14 for composition of the polyetheramine polymer, column 5, lines 40-67 for laminate structure, column 6, lines 5-10 for PET and polyolefins as in the claimed structure, column 6, lines 20-55 for polymers used in laminate structure as in the claimed invention, Example 1 for preparation of PHAE polymer that is identical to the polymer claimed by applicants, Tables 1-4 for composition of the layers. The applied reference does not specifically teach a metal-containing layer. However, it is well established in the art that the metal

containing layers improve barrier properties of laminates. It would have been obvious to use a metal containing layer in Beckerdite to improve barrier properties of the laminate.

The amendments and remarks filed by applicants have been fully considered. The claims, however, remain unpatentable in view of the above rejections.
